CAREER OBJECTIVE

To be part of a dynamic and growth-oriented organization where I can effectively apply my technical skills in web development and system design, contribute to innovative and impactful projects, and continuously enhance my knowledge in the field of information technology. I aim to develop high-quality solutions that improve efficiency and user experience while gaining valuable industry experience. Additionally, I seek to grow both personally and professionally by collaborating with experienced professionals, adapting to new technologies, and taking on challenging responsibilities that will further strengthen my competencies and career development.

EDUCATION

Bachelor of Science in Information Technology (BSIT) <i>Our Lady of the Sacred Heart College of Guimba, Inc.</i> Afan Salvador St, St. John, Guimba, Nueva Ecija	2022 -2026

WORK EXPERIENCE / TRAINING

Front/Backend Web Developer | iSynergies System

- Developed and maintained web-based systems using PHP and MySQL, supporting daily operations for over 50+ active users. Designed and implemented responsive user interfaces using HTML, CSS, and JavaScript, improving usability and accessibility across multiple devices.
- Built core functionalities including user authentication, CRUD operations, and automated report generation, reducing manual processing time by approximately 40%. Developed an accounting system module that managed and processed 1,000+ financial records, improving accuracy and efficiency in financial reporting.
- Managed and optimized database structures and executed complex SQL queries using MySQL Query Browser, handling datasets with 5,000+ records and improving query performance and data retrieval speed. Developed key modules such as user records, complaints management, and system dashboards to support system operations.
- Conducted system testing, debugging, and performance optimization, reducing system errors and ensuring stable performance. Collaborated with the development team and followed best practices in coding and documentation to deliver reliable and scalable solutions.

STRONG POINTS

- Proficient in using HTML, CSS, PHP, and JavaScript to build responsive and user-friendly web interfaces.
- Experienced in developing web applications using C# in the ASP.NET environment, focusing on structured backend logic and web application workflows.
- Skilled in database design, management, and querying using MySQL Workbench and MySQL Query Browser to support dynamic, data-driven systems.
- Capable of integrating hardware and software systems using Arduino C/C++, enabling real-time data collection and system interaction.
- Knowledgeable in implementing secure and functional web features, including authentication, form validation, and system monitoring.

CERTIFICATIONS

- Security for Software Development Managers (LFD125)
- Understanding the EU Cyber Resilience Act (CRA) (LFEL1001)
- XSS Exploits and Defenses (LFEL 1010)
- Introduction to Zero Trust (LFS183)
- Automating Supply Chain Security: SBOMs and Signatures (LFEL 1007)
- Securing Projects with OpenSSF Scorecard (LFEL1006)
- Understanding OWASP Top 10 Security Threats (SKF100)
- Introduction to DevSec Ops for Managers (LFS180)
- Developing Secure Software (LFD121)
- Securing your Software Supply Chain with Sigstore (LFS182)
- Ethical Hacker (Cisco Networking Academy Program)
